# HEALTHCARE CAREER NIGHT BREAKOUT SESSIONS.

**EMS** - Pre-hospital emergency medical services (911) and inter-hospital transport

**Medical Assistant** - Perform administrative and clinical tasks to support the work of medical doctors and other health professionals

**Medical Office** - Support clinical staff to assist in creation and retention of quality medical documentation based on patient care

**Medical Therapies** - Provide treatment to remediate a health problem, usually following a diagnosis

**Non-Direct Patient Care** - Support services in healthcare such as Information Technology or Bio-medical engineering

**Nursing** - Opportunities in patient care, management, research and education

**Physician** - Evaluate, diagnose and treat patients in a clinic, ER, operating room and hospital

**Physician Assistant** - Work under the supervision of a physician in doctor's offices, ER and surgery

**Pharmacy** - Prepare and dispense medications, and counsel patients and healthcare professionals

**Radiology** - Opportunities in X-ray, CT-scan, MRI and fluoroscopy in many different settings

**Respiratory** - Treat patients with respiratory disorders from the doctor's office, ER and ICU

**Simulation – Virtual Hospital** - Students will also be able to experience high-tech healthcare simulation at the David Mead Massie Virtual Hospital. Here they will be able to interact with the human patient simulators that provide a very realistic patient-care experience. Students may choose this as one of their breakout sessions or attend any of the additional demonstrations offered throughout the evening.
